

Brunswick Engineering Group of Companies is a locally owned and operated consulting engineering company that provides geotechnical, municipal, materials, and environmental engineering services.

Located in Saint John, NB, we have been serving Atlantic Canada since 2012. Our approach is based on simple, practical solutions using the best technology and industry standards available. We strive to provide our clients with the best professional service possible, whilst offering innovative solutions to keep your project within budget.

We're proud to offer the latest technology such as Unmanned Aerial LiDAR (UAV), Autonomous Surface Vehicle (ASV), Ground Penetrating Radar (GPR), and legal surveying to provide the best experience for our clients.

Role Description

This is a full-time, onsite role as a Civil Engineering Design Technologist, located in Saint John, NB. The successful candidate will be responsible for assisting in the design of various civil/municipal engineering projects and delivering quality services that meet technical guidelines and standards in a wide range of civil engineering disciplines.

Qualifications

- Diploma in Civil Engineering Technology with preference given to Highways and Municipalities (or equivalent) graduates.
- Proven experience using AutoCAD, Civil 3D, and related software.
- Experience in preparing construction drawings.
- Excellent written and verbal communication skills, time management skills, the ability to work independently and in a team environment.
- Valid New Brunswick driver's license.
